E-SERVICE FOR MUNICIPALITIES

VALSTYBĖS ĮMONĖ
REGISTRŲ CENTRAS

REGIONAL GEO-INFORMATION ENVIRONMENT SERVICE

- REGIA is a powerful and handy tool specifically developed for local authorities: their people, civil servants and therein operating businesses.

- Purpose of REGIA is to create favourable conditions for geography-based decision-making and to facilitate the exchange of information.

FOR CITIZENS — FOR BUSINESS — FOR GOVERNMENT
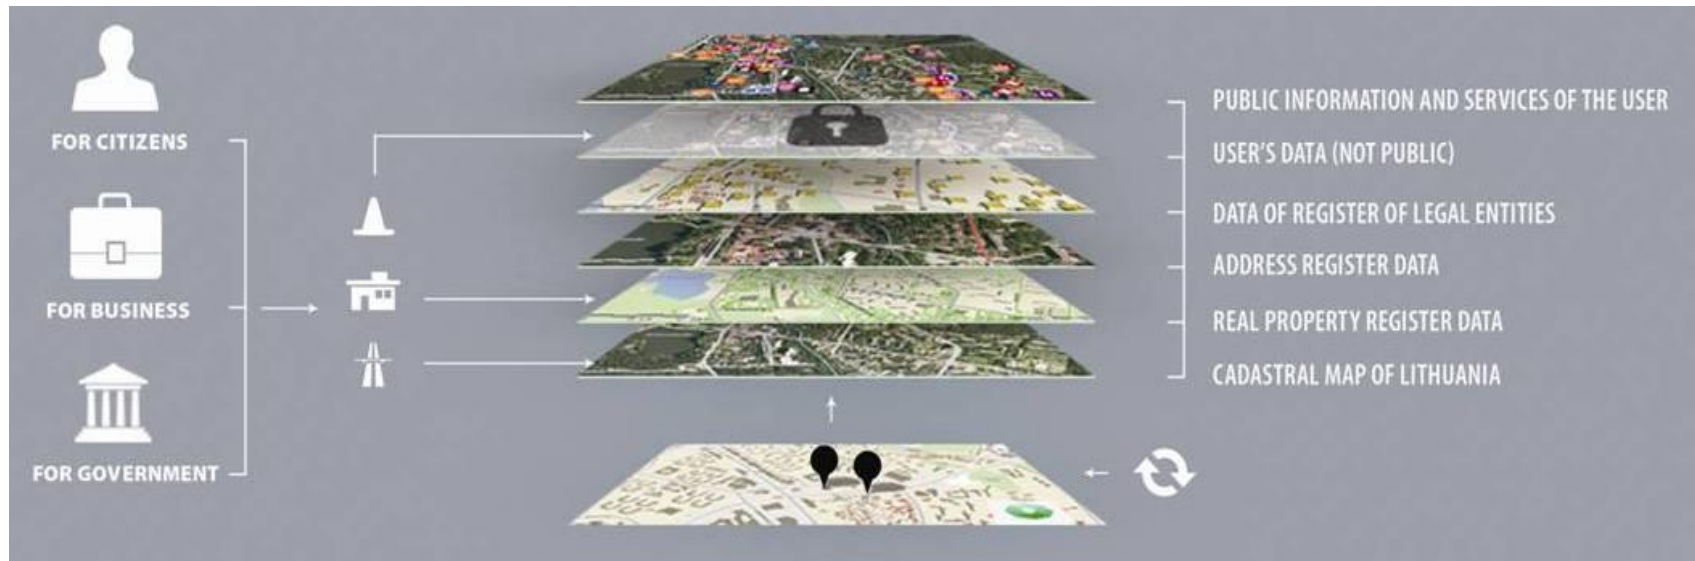

REGISTRŲ CENTRAS

CLOUD PRINCIPLE

- All information created by a user, data recorded, uploaded documents are accumulated and stored in the REGIA servers and are accessible from any computer.
- Easy to use. It is enough to have a computer with Internet connection.
- All services are managed through the web browser.

REGISTRŲ CENTRAS

Published documents
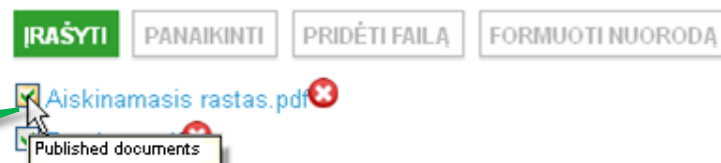

PUBLIC REGIA

- It is up to the user to decide whether his data layer is publicly visible and who is entitled to use it.
- REGIA services in the review mode are publicly accessible.

REGIA SERVICE FOR BUSINESS

- Companies can use REGIA map as a tool for advertising their business that helps to direct a potential user to the place where desired goods or services are provided.

- Using the tools provided by REGIA, business services can be created and distributed on the basis of available data.

- REGIA seems to be a great helper for entrepreneurs in preparing and presenting construction and territory development projects to public institutions or investors.
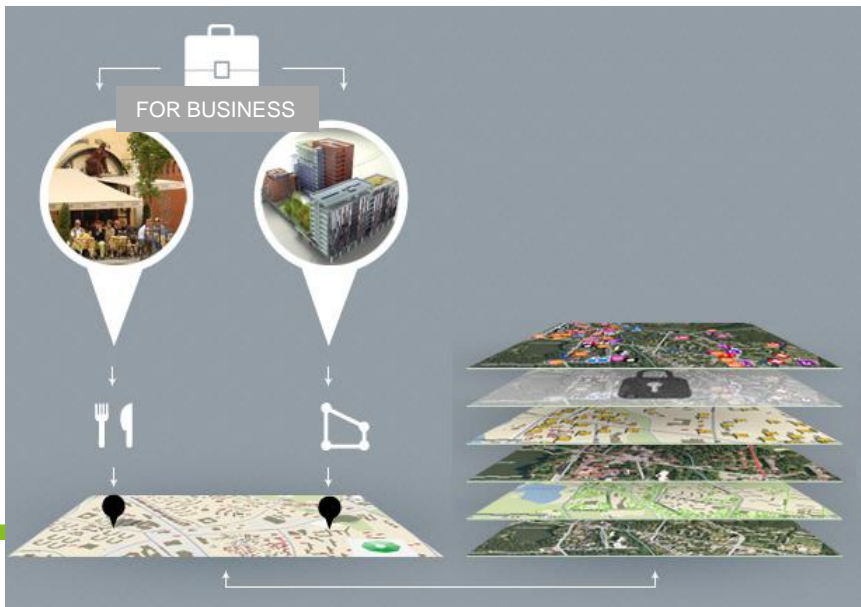

REGIA SERVICE FOR CITIZENS

- A person, using REGIA service, can quickly and easily obtain understandable information about the municipality activities and its adopted decisions.

- In the REGIA map people will always find information about the real property objects of interest to them, their addresses, value as well as companies, agencies and organizations operating there.

- New REGIA tools are being created that will allow residents themselves communicating through REGIA with local government and business service providers.
